

CS 260 Group Evaluation for Assignment 3 – Linked Lists

Your name: <input type="checkbox"/> (Person whose work is being evaluated)	Robert Moore
Names of other group members participating in the evaluation:	Brinden Robinson
Date:	4/25/18

Instructions You should have already completed Assignment 3 and uploaded your source files to Moodle. After you and another student (or students) have evaluated your work, you will submit this evaluation along with any revisions to your lab work to Moodle. You will be graded on your revised lab work and the quality of this evaluation, but this evaluation will not determine your grade.

Criteria	Evaluation
<i>Text class</i>	
Is the program properly broken into multiple parts?	Yes
Does the program compile without errors or warnings and run without crashing?	Yes
Does it complete all the tests properly?	Yes
<i>List Join</i>	
Does the new method properly add the elements of the second list to the first?	Yes
Do changes to the combined list properly not affect the second list?	Yesyes
Did it pass the described test for combining and changing “This is a cat” and “That is a dog” to “This is a cat and that is a dog”?	
<i>StudentList</i>	
Does the program compile and run without errors or warnings and run without crashing?	Yes
Does it complete all the tests properly?	Yes

☐

General Comments:

Looks good, simple, and commented.
